

WANDR

Hidden Places, Found Together

Community-Powered Group Travel Discovery

Made with GAMMA

About the Product

Wandr solves the consensus and safety-verification problems generic travel platforms ignore — quizzing your group and surfacing underrated, safety-verified destinations tailored to your collective vibe and budget.

Group Quiz Matching

Aggregates everyone's answers into one shared vibe profile

Safety Score

Verified badge from a volunteer moderation network

Zero Tourist Traps

Only underrated, community-submitted spots

Made with GAMMA

Vision & Mission

- Turn individual quiz answers into one collective group vibe profile
- Solve the problems groups don't talk about: unequal budgets, one person deciding, unverified safety
- Keep discovery community-sourced and free of tourist traps
- Build safety scores with real volunteer moderators, not algorithms alone

Our Vision

To become the go-to platform every travel group turns to for consensus-driven, safety-verified discovery — so no one settles for a destination they didn't actually choose.

Made with GAMMA

Problem Statement

Group travellers waste hours on generic platforms that recommend the same overcrowded spots, with no way to align a group's preferences or verify safety.

Overcrowded Spots

Same viral destinations every time

Lost Authenticity

Mass tourism strips local character

No Group Consensus

One person ends up deciding

Half-Hearted Compromises

Preferences clash, no one's happy

Safety Gaps

Unknown destinations, unverified data

Outdated Reviews

No reliable local safety source

Research Methods

📊 Instagram Poll *(n=168)*

Surveyed target group travellers on trip-planning pain points

🗣️ Friend Interviews

Budget alignment is the top group-trip blocker; couples want new & romantic spots

🔍 Competitor Gap Analysis

No existing platform offers group-consensus matching with safety verification

🧳 Personal Experience

Firsthand planning highlighted the friction of balancing preferences, budgets, and safety

👂 Reddit & Social Listening

Observed recurring concerns around destination overload, trust, and decision fatigue
