MY DUAL CONTEXT

Two very different Indias shaped how I see problems.

JAIPUR, RAJASTHAN

- The arid north — desert heat, scarce water
- Heritage-rich but resource-constrained
- Saw firsthand: community vulnerability during crisis
- Home of my NGO & ground-level work

BENGALURU, KARNATAKA

- India's tech capital — rapid urbanisation
- Flash floods, lake crises, density challenges
- Where I study innovation & business systems
- Where I ask: can tech solve what growth breaks?

Curiosity: What does resilience actually look like across different geographies?
